## Education

---

### **PES University**

*Bachelor of Technology in Computer Science*

**CGPA: 7.04**

Bangalore, KA

Aug. 2023 – May 2027

### **Presidency SBS**

*Senior Secondary (Class 12)*

*Percentage: 83.0%*

Bangalore, KA

2023

### **BGS NPS**

*Secondary (Class 10)*

*Percentage: 83.5%*

Bangalore, KA

2021

## Experience

---

### **Summer Intern**

*Transaction Analysts*

June 2025 – July 2025

*(2 months)*

- Gained hands-on experience in **native Android app testing** using **Appium**
- Developed an **Aadhaar censoring tool** to automatically detect and mask Aadhaar numbers in documents.
- Created **home screen widgets** and **app shortcuts** to enhance functionality of the company's Android app.
- Built an **AI-powered help chatbot** for the company's website using a guided flow and conversational AI.

## Projects

---

### 1. **Bill Split**

Developed a MERN Stack application for seamless bill splitting among users, enabling real-time expense tracking, user authentication, and automated settlement calculations.

### 2. **Weather Monitoring System**

Built an Arduino-based weather tracking system using moisture, rain, and temperature sensors to monitor conditions and display real-time alerts on an LCD screen.

### 3. **AI Powered CI/CD Failure Predictor (In-progress)**

- Engineered a data pipeline using Python and Regex to automatically extract, parse, and tokenize unstructured CI/CD build logs into structured datasets.
- Trained a machine learning classification model utilizing pandas and scikit-learn to predict pipeline failures based on log patterns and automate root-cause error isolation.

## Technical Skills

---

**Languages:** Python, C, SQL (OpenSQL), JavaScript, HTML/CSS

**Frameworks:** React, Node.js

**Libraries/Tools:** pandas, NumPy, Matplotlib, Appium, Selenium, PyTesseract

**Developer Tools:** Git, Visual Studio, IntelliJ
